Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Mr. Schulte mentioned that in the preliminary amendment the second occurrence of "page 15" should have been page 16 and will be corrected in the amendment. Regarding Stefik, Mr. Schulte emphasized that the user inputs the desired watermark and then it is printed on the document, whereas the invention uses a policy to determine the protection level needed. The examiner emphasized that claim 1 can still be broadly interpreted to read on Stefik because there is no recitation of using a policy in claim 1. The addition of this feature appears to overcome Stefik for both claims 1 and 14, which already includes this limitation .
